## Project Design Phase-II Technology Stack (Architecture & Stack)

| Date          | 13 October 2022  |
|---------------|--|
| Team ID       | PNT2022TMID03096   |
| Project Name  | Project -Real time River water monitoring and control system |
| Maximum Marks | 4 Marks  |

**Technical Architecture:** 

**Table-1 : Components & Technologies:** 

| S.No | Component                       | Description   | Technology  |
|------|---------------------------------|---|---|
| 1.   | User Interface                  | How user interacts with application e.g.<br>Web UI, Mobile App, Chatbot etc.                                  | HTML, CSS, Node-Red ,Cloud,etc.                                   |
| 2.   | Application Logic-1             | Logic for a process in the application  | Java / Python   |
| 3.   | Application Logic-2             | Logic for a process in the application  | IBM Watson STT service  |
| 4.   | Application Logic-3             | Logic for a process in the application  | IBM Watson Assistant  |
| 5.   | Database                        | Data Type, Configurations etc.  | MySQL, NoSQL, etc.  |
| 6.   | Cloud Database                  | Database Service on Cloud   | IBM DB2, IBM Cloudant etc.  |
| 7.   | File Storage                    | File storage requirements   | IBM Block Storage or Other Storage<br>Service or Local Filesystem |
| 8.   | External API-1                  | Purpose of External API used in the application   | IBM Weather API, etc.   |
| 9.   | External API-2                  | Purpose of External API used in the application   | Aadhar API, etc.  |
| 10.  | Machine Learning Model          | Purpose of Machine Learning Model   | Object Recognition Model, etc.                                    |
| 11.  | Infrastructure (Server / Cloud) | Application Deployment on Local System / Cloud<br>Local Server Configuration:<br>Cloud Server Configuration : | Local, Cloud Foundry, Kubernetes, etc.                            |

**Table-2: Application Characteristics:** 

| Characteristics          | Description  | Technology  |
|--------------------------|--|---|
|                          |  |   |
| Open-Source Frameworks   | List the open-source frameworks used   | Technology of Opensource framework  |
| Security Implementations | List all the security / access controls implemented,                               | e.g. SHA-256, Encryptions, IAM  |
|                          | use of firewalls etc.  | Controls, OWASP etc.  |
| Scalable Architecture    | Justify the scalability of architecture (3 – tier,                                 | Technology used   |
|                          | Micro-services)  |   |
| Availability             | Justify the availability of application (e.g. use of                               | Technology used   |
| -                        | load balancers, distributed servers etc.)  |   |
| Performance              | Design consideration for the performance of the                                    | Technology used   |
|                          | application (number of requests per sec, use of                                    |   |
|                          | Cache, use of CDN's) etc.  |   |
|                          | Open-Source Frameworks Security Implementations Scalable Architecture Availability | Open-Source Frameworks  List the open-source frameworks used  List all the security / access controls implemented, use of firewalls etc.  Scalable Architecture  Justify the scalability of architecture (3 – tier, Micro-services)  Availability  Justify the availability of application (e.g. use of load balancers, distributed servers etc.)  Performance  Design consideration for the performance of the application (number of requests per sec, use of |
